

```
print("Hello, Google Colab!")
```

 Hello, Google Colab!

```
!pip install numpy
```

 Requirement already satisfied: numpy in /usr/local/lib/python3.11/dist-packages (1.26.4)

```
import numpy as np
arr = np.array([1, 2, 3, 4, 5])
print(arr)
```

 [1 2 3 4 5]

```
from google.colab import drive
drive.mount('/content/drive')
```

 Mounted at /content/drive

```
from google.colab import files
uploaded = files.upload()
```

 No file chosen

```
import torch
print(torch.cuda.is_available())
```

 False
